Facts and Figures

Characteristics

High content of linoleic acid.

Available Qualities

cold pressed

Certification

DE-ÖKO-007
COSMOS certified
Kosher

Basic Plant

Papaver somniferum L. (Papaveraceae - Poppy Family), Schlafmohn, Gartenmohn

INCI

Papaver Somniferum Seed Oil

Cas-No.

84650-40-8

Packaging / Container

Canister, drum

Composition

C16:0 Palmitic acid: 4-12 %
C18:1 Oleic acid: 14-30 %
C18:2 Linoleic acid: 60-80 %

Shelf Life

Good Shelf Life

Details about Poppy Seed Oil

Description

The lightly yellow poppy seed oil is one of the oldest oils in Europe which has now been rediscovered and turned into a rarity.

Special Characteristics

Poppy seed oil has a high content of linoleic acid. It is similar to sunflower oil.

Application Cosmetics

In cosmetics the nourishing qualities of poppyseed oil are used. The oil absorbs quickly and acts greasing. Poppyseed oil is good for ointments, lotions to treat dry skin and for anti-wrinkling creams.

Application Food

Poppyseed oil is used as a high end salad oil and for refining sweet dishes, mueslis and salads. Due to its high content of polyunsaturated linoleic acid virgin poppyseed oil shouldn't be used for cooking and baking.
